VERIFIED STATEMENT OF FACTS BY INVENTOR TO BE ADDED

1. The above-named patent application was filed in the United States Patent and Trademark Office by Jonathan R. Rich, Douglas B. Guthrie, Terry E. Nels and Eric A. Schueler in good faith and without deceptive intent on October 2, 2003.

2. Euroflamm Select Inc. (hereinafter "Euroflamm") is the assignee of the above-named patent application. The FRICTION FACING MATERIAL FOR USE IN A FRICTION ENVIRONMENT is the subject of the above-named application and is manufactured, sold and/or promoted by Euroflamm.

3. The following facts substantiate the claim that I should be considered a joint inventor in the above-named application:

- a) The application was originally submitted to the U.S. Patent and Trademark Office with formal papers which indicated that Jonathan R. Rich, Douglas B. Guthrie, Terry E. Nels and Eric A. Schueler were the inventors.
- b) At the time the present application was filed, I was out of the country in Germany.
- c) On or about November 4, 2003, I inquired as to the status of the U.S. application, at which time I discovered that I was not named as a co-inventor on the above-named application. After reviewing the patent application as originally filed, I advised Terry E. Nels, Vice President of Euroflamm Select Inc., that I thought I should be added as a joint inventor to the application.
- d) Attached please find a copy of a drawing showing at least two features that I believe I contributed to the application, the features being shown on page 3 of the document in that the channels have U-shaped and V-shaped bottom surfaces as shown and as claimed in claims 8, 9, 40, 41, 87 and 88. This drawing was hand delivered to Mr. Nels on or about June 9, 2003.
- e) My reasons for believing I am a co-inventor are as follows: Through 2003 I was involved in various phases of the development of the friction facing material for use in a friction environment which is the subject of the pending application. For example, claims 8, 9, 40, 41, 87 and 88 recite:

8. The friction material facing as recited in claim 6 wherein said surface is generally U-shaped in cross section.

9. The friction material facing as recited in claim 6 wherein said surface is generally V-shaped in cross section.

40. The friction material as recited in claim 38 wherein said surface is generally U-shaped in cross section.

41. The friction material as recited in claim 38 wherein said surface is generally V-shaped in cross section.

87. The friction member as recited in claim 85 wherein said surface is generally U-shaped in cross section.

88. The friction member as recited in claim 84 wherein said surface is generally V-shaped in cross section.

I believe that I contributed to the conception, development and manufacture of these features of the invention.

f) I coordinated, directed and provided "hands-on" support, design and guidance relative to the aforementioned claimed features which are the subject of this application. I also made decisions and design suggestions on "which way to go" relative to the features of the friction facing material.

g) After discovering my non-joinder on or about November 4, 2003, I informed Mr. Terry Nels, who in turned informed Mr. Matthew R. Jenkins, an attorney of record, that I should be added to the application. The preparation of this response/petition immediately followed.

h) I understand that the above-named patent application is pending before the United States Patent and Trademark Office.

i) At the time the above-named patent application was filed, all of the named inventors, Jonathan R. Rich, Douglas B. Guthrie, Terry E. Nels and Eric A. Schueler were employees of Euroflamm Select Inc., the assignee of the present application. Such inventors remain employees of Euroflamm Select Inc.

j) This Statement of Facts is being presented so that I may be included as a joint inventor on the above-named application and to correct an error in inventorship that occurred in good faith and without any deceptive intent.

4. I, Dietmar Koester, do further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both,

VERIFIED STATEMENT OF FACTS BY INVENTORS
DOUGLAS B. GUTHRIE, TERRY E. NELS, JONATHAN M. RICH
AND ERIC A. SCHUELER PRESENTLY ON APPLICATION

1. The above-identified application was filed on October 2, 2003 in the United States Patent and Trademark Office by Douglas B. Guthrie, Terry E. Nels, Jonathan M. Rich and Eric A. Schueler in good faith and without deceptive intent.

2. At the time this application was filed, we reviewed the application, declaration and power of attorney and assignment included therein, and again, we restate that the application was submitted in good faith without any deceptive intent listing only Douglas B. Guthrie, Terry E. Nels, Jonathan M. Rich and Eric A. Schueler on the Declaration in Support of Patent Application.

3. On or about November 5, 2003 we learned that Dietmar Koester felt he should be included as a joint inventor on the above-identified application. Upon learning this and reviewing the facts, claims and application papers, we felt that Dietmar Koester had made contributions to the design and features of the invention that we
